

Appendix N: Continuous Monitoring Plan

This needs work that may have been completed elsewhere and needs to be moved into here. This needs MVP and Normalized content examples

MVP Key Points Include:

- The CA-7 (`id = ca-7`) control should have `links` entries to the RoB

This is not normalized and is only for legacy conversion MVP

Normalized Key points include:

- attach the Continuous Monitoring Plan as a back-matter/ `resources` entry
- create a component for the Continuous Monitoring Plan
 - From the component, add a `links` entry that references the `resource` (`#uuid-value`)
- The CA-7 control has `by-components` entries that cite the Continuous Monitoring Plan component

Reference Components [need citation - there may be a page for document-type components] and Attachments pages. Don't duplicate those explanations here.
