

Appendix P: Supply Chain Risk Management Plan (SCRMP)

This needs work that may have been completed elsewhere and needs to be moved into here. This needs MVP and Normalized content examples

MVP Key Points Include:

- The SR-2 (`id = sr-2` control should have `links` entries to the user guide

This is not normalized and is only for legacy conversion MVP

Normalized Key points include:

- attach the SCRMP as a back-matter/ `resources` entry
- create a component for the SCRMP
 - From the component, add a `links` entry that references the `resource` (`#uuid-value`)
- The SR-2 control has `by-components` entries that cite the SCRMP component

Reference Components [need citation - there may be a page for document-type components] and Attachments pages. Don't duplicate those explanations here.

Revision #2
